Important Health Warning About Playing Video Games

Photosensitive Seizures

A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people who have no history of seizures or epilepsy may have an undiagnosed condition that can cause these “photosensitive epileptic seizures” while watching video games.

These seizures may have a variety of symptoms, including lightheadedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion, or momentary loss of awareness. Seizures may also cause loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects.

Immediately stop playing and consult a doctor if you experience any of these symptoms. Parents should watch for or ask their children about the above symptoms—children and teenagers are more likely than adults to experience these seizures. The risk of photosensitive epileptic seizures may be reduced by taking the following precautions:

- Sit farther from the television screen.
- Use a smaller television screen.
- Play in a well-lit room.
- Do not play when you are drowsy or fatigued.

If you or any of your relatives have a history of seizures or epilepsy, consult a doctor before playing

The city is Willamette, Colorado. One day, this small, run-of-the-mill town found itself sealed off from the rest of the world. National Guard troops blocked off the roads, and all transmissions were put into tight information lockdown. Communication lines were closed off, and wireless radio waves jammed. Something was going down. Something big, real big.

Enter Frank West, freelance photojournalist. His instincts have gotten him out of some nasty situations in the past, and this time they tell him something huge is happening. Armed with a camera, he hires a junker helicopter to take him in. With luck, he'll score the biggest story of his career!

The helicopter pilot, oblivious to the state of emergency, does his usual tour-guide thing. "Here she is! Willamette, Colorado. Population 53,594!"

Through the zoom lens on his camera, Frank scans what looks like a normal small town. But as the helicopter descends toward the landing zone, Frank finds himself in the midst of his most dangerous story yet!

If your character gets hurt and your life bar reaches 0, it's game over.

DATA CARRYOVER

If you save your status at this time and then select NEW GAME from the Main Menu, you can start over with the same level and status as before.

SAVING

You can save the game in certain places such as in restrooms and by the sofa in the Security Room, and also at certain times such as after beating the game.

There is only one save slot, but you can use a storage device or separate gamer account to create multiple saves.
