Important Health Warning About Playing Video Games

Photosensitive seizures
A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people who have no history of seizures or epilepsy may have an undiagnosed condition that can cause these “photosensitive epileptic seizures” while watching video games.

These seizures may have a variety of symptoms, including lightheadedness, altered vision, eye or face twiching, jerking or shaking of arms or legs, disorientation, confusion, or momentary loss of awareness. Seizures may also cause loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects.

Immediately stop playing and consult a doctor if you experience any of these symptoms. Parents should watch for or ask their children about the above symptoms—children and teenagers are more likely than adults to experience these seizures. The risk of photosensitive epileptic seizures may be reduced by taking the following precautions: Sit farther from the screen; use a smaller screen; play in a well-lit room; do not play when you are drowsy or fatigued.

If you or any of your relatives have a history of seizures or epilepsy, consult a doctor before playing.

ESRB Game Ratings
The Entertainment Software Rating Board (ESRB) ratings are designed to provide consumers, especially parents, with concise, impartial guidance about the age-appropriateness and content of computer and video games. This information can help consumers make informed purchase decisions about which games they deem suitable for their children and families.

ESRB ratings have two equal parts:

• Rating Symbols suggest age appropriateness for the game. These symbols appear on the front of virtually every game box available for retail sale or rental in the United States and Canada.

• Content Descriptors indicate elements in a game that may have triggered a particular rating and/or may be of interest or concern. The descriptors appear on the back of the box next to the rating symbol.

Just as the excitement of the previous, now legendary tournament finally fades, word of a new world fighting tournament spreads like wildfire among martial artists across the globe, trailing a series of bizarre rumors along behind.

The mysterious disappearances of numerous famous fighters.
A terrible threat in the form of a new, deadly secret weapon.
The possible connection between S.I.N., the sponsor of the new tournament, and the supposedly destroyed Shadaloo.

New fighters also step up and make themselves known, almost as though responding to these troubling rumors.

A young man who searches for his lost past.
A female agent with the potential to be an executive member of S.I.N.
A man who burns with the desire to defeat his greatest rival.
A Luchador who seeks the ultimate recipe.

Before these newcomers stand those from the previous tournament, each bringing their own renewed determination.

Some fight for those dear to them.
Some fight to finally take their revenge.
And some fight simply so that the entire world will chant their name.

A complex clash of human relationships and the truth of a terrible plot that lurks behind the championship.

This is the chaos that Ryu, who has been honing his skills with the simple goal of becoming the ultimate fighter, one beyond the constraints of mere mortality, now finds himself thrown into...

Amid pursuit and escape, friendship and betrayal, the curtain rises on a new stage of battle!

**Rules of Combat**

**Match Setup**

The default setting is three round matches, with the first fighter to win two rounds declared the victor.

**Winning Rounds**

A single round lasts for a maximum of 99 on the time counter. Reduce your opponent's Vitality Gauge to 0 within that time for a win by KO. If the time runs out then the fighter with the most vitality remaining will be declared the winner.

**A Draw**

A draw occurs when both fighters' vitality falls to 0 simultaneously or their remaining vitality is exactly the same when the time runs out. If the final round of a match ends in a draw then it is game over.

Basic Controls

All of the controls shown in the basic controls section are for when your character is facing the right. When facing the left, all left/right controls should be reversed.

NORMAL MOVES

Press the punch or kick buttons to perform normal moves. The actual attack performed depends on the position of your character and the button pressed.

SPECIAL MOVES

Inputting a specific combination of directional and attack buttons allows you to perform a special move. Even if your opponent blocks a special move, they will still take a small amount of damage. Inputting the command for a special move during certain normal moves allows you to cut short, or “cancel,” the normal move and quickly go straight into performing the special move. Using cancelling skillfully is one way to create damaging combinations.

BONUS MESSAGES

<td>A counter hit occurs when you interrupt an opponent’s attack with one of your own. Your opponent will take longer to recover from the damage caused by a Counter Hit, making it possible to perform combinations that are otherwise impossible.</td>
</tr>
</tbody>
</table>

BLOCK

Pushing the D-pad away from your opponent allows you to block their attacks. You can block high (standing) and low (crouching) attacks. High and low blocks can block specific attacks, but not every attack. You will need to carefully and quickly swap between them to block all incoming attacks. You cannot block while in the air.

DASH

Press the D-pad twice quickly forward to perform a forward dash, or backward twice to perform a backward dash. Dashing allows you to quickly close the distance between you and your opponent, or to fall back and reassess the situation.

STUN RECOVERY

If you keep getting pummeled, you will eventually become stunned. While stunned, you cannot do anything. Your only hope is to press the D-pad and other buttons as fast as you can to recover from the stun faster.
**THROWS AND THROW ESCAPES**

When standing close to your opponent, pressing the light punch and light kick buttons simultaneously allows you to throw your opponent. You can change the direction you throw the opponent by pressing the D-pad left or right. You can prevent yourself from being thrown by pressing light punch and light kick together when your opponent begins to throw you. This is called a “throw escape.”

* Some characters can also perform a throw when jumping (aerial throw), or special move throws (command throws). Throw escapes cannot be performed against aerial or command throws.

**RECOVERY**

When your opponent’s attacks have knocked your character to the ground, you can either press the D-pad down or any two buttons together in the instant that you hit the ground to perform a quick recovery. A successful recovery will reduce the amount of time spent prone on the ground and make it easier to respond to the next incoming attack.

* Some attacks, such as throws, do not allow a recovery to be performed after them.

**PERSONAL ACTION**

While standing, you can press the heavy punch and heavy kick buttons together to make your character perform a personal action and taunt your opponent. This action in and of itself has no special properties.

**FOCUS ATTACK**

**PERFORMING A FOCUS ATTACK**

Press and hold the Medium Punch and Medium Kick buttons together to charge up a Focus Attack. To perform a full strength Focus Attack, hold the buttons until the attack is unleashed automatically. If you release the buttons while charging, the Focus Attack will come out sooner, but weaker.

**HYPER ARMOR DURING A FOCUS ATTACK**

You can absorb up to one enemy attack in the time between pressing the Medium Punch / Medium Kick buttons and the Focus Attack being performed. You can then go on to counter by performing the attack.

* This method is not effective when your opponent uses an attack with the “Armor Break” property.

Absorb an opponent’s attack and, rather than take direct damage, a section of your vitality gauge will change color, and will then regenerate over time. This damage will recover as time passes, but if you are hit again before it finishes recovering, the remaining section will vanish and can no longer be recovered.
There are three levels of charging for a Focus Attack. The levels depend on how long you hold the Medium Punch and Medium Kick. Your character will flash white each time the Focus Attack level increases.

**Attack Level** | **Main Benefits of Focus Attack Performed**
--- | ---
Level 1 | Only does regular damage
* Crumples opponent if a counter hit
Level 2 | Crumples opponent if hits, allowing easier follow up
Level 3 (Keep Holding Until Performed) | Becomes unblockable
Has Armor Break properties
Crumples opponent if hits, allowing easier follow up

When an opponent crumples, they are rendered totally defenseless as they fall to the floor. Follow up with extra attacks or a throw to take advantage of a crumpled opponent and do further damage.

**OTHER ACTIONS DURING A FOCUS ATTACK**
You cannot move or jump during a Focus Attack, but you can perform either a forward or backward dash to cancel the Focus Attack quickly.

**SUPER COMBO**
Hitting your opponent or performing special moves will increase your Super Combo Gauge. The gauge is divided into four segments and, when completely full, a special command can be inputted to perform an all-powerful Super Combo. Doing so will use up all of your Super Combo Gauge. (See P.34 onward for Super Combo commands)

**SUPER CANCEL**
Input the Super Combo command while performing a normal move or special move and you can cancel and move directly into the Super Combo. This is called a “Super Cancel.” Using Super Cancels strategically allows you to chain a normal move into a special move, and then into a Super Combo for massive amounts of damage.

**EX SPECIAL MOVES**
You can also perform an EX special move by pressing two or more of the required buttons (punch or kick) when inputting a special move command. This will consume one segment of your Super Combo Gauge. EX special moves are further powered up versions of your normal special moves.
**EX FOCUS**

When performing certain regular or special moves it is possible to press Medium Punch and Medium Kick together and cancel into a Focus Attack. This is called “EX Focus.” (It will consume two segments of your Super Combo Gauge.) EX Focus has the same properties as a regular Focus Attack, aside from having no Hyper Armor effect.

Example:

In the instant that Ken's Shoryuken hits press Medium Kick and punch together

EX Focus is activated

Immediately perform a forward dash to cancel the Focus Attack

Follow up with another Shoryuken!

You can also used EX Focus when your special moves are blocked to protect yourself from your opponent's counterattack.

Ken's Shoryuken has been blocked

Wary of opponent's counterattack use EX Focus to cancel the Shoryuken

Then perform a backward dash to get away from the opponent

**ULTRA COMBO**

The Revenge Gauge fills up as your opponent damages you. Once it is over 50% full, you can input a character-specific command to perform an “Ultra Combo,” a devastating special move. Performing an Ultra Combo will consume the entire Revenge Gauge. The higher the gauge is charged upon performing the attack, the more damage the Ultra Combo will do.

Example:

The Revenge Gauge fills up as your opponent damages you. Once it is over 50% full, you can input a character-specific command to perform an “Ultra Combo,” a devastating special move. Performing an Ultra Combo will consume the entire Revenge Gauge. The higher the gauge is charged upon performing the attack, the more damage the Ultra Combo will do.
**Game Modes**

**Arcade Mode [For 1 or 2 Players]**

In this mode, you select one character and then fight through a series of CPU opponents. There are eight levels of CPU character difficulty, from [EASIEST] up to [HARDEST]. If you are defeated along the way, you can still continue. If you have two controllers, pressing the START Button on the second controller allows another player to challenge the first player to combat.

**Arcade Fight Requests**

In Arcade Mode, if you don’t set the Arcade Fight Request to OFF, you won’t be able to play with two local players. When the Arcade Request Setting is turned ON, you can receive challenges for Network Battle from online players while playing Arcade Mode.

* In order to allow a second player to challenge the "Arcade Fight Request" (P.25) must be turned OFF.

**VS Mode**

In this mode, you can select a character, a stage, and fight against a CPU or human opponent. You can also select a handicap according to skill. “PLAYER VS PLAYER” can only be chosen when two controllers are connected.
